Objective

Passionate and results-driven Computer Science and Engineering graduate with a strong foundation in Machine Learning and Data Science. Adept at leveraging algorithms, statistical modelling, and big data analytics to derive actionable insights and drive data-driven decision-making. Seeking an opportunity to apply my technical expertise in software development, AI, and predictive analytics to solve real-world problems and innovate in the field of intelligent systems.

Professional Experience

Data Strategists
Zuez Ai, Bangladesh *January, 2025 - Running*

- Analyzed sales and operational data to define **KPIs** and deliver actionable insights for strategic decision-making.
- Built revenue forecasting models using predictive **machine-learning** techniques to support growth planning.
- Designed and maintained **automated *BI dashboards*** to monitor performance and improve reporting efficiency.
- Developed **merchant segmentation** and anomaly detection models to enhance engagement and operational effectiveness.

Web Developer and CRM Administrator
Global Education Care *January, 2024 – December, 2024*

- Design, build, and optimize responsive websites using modern web technologies.
- Manage, customize, and maintain CRM systems to enhance user experience and efficiency.
- Ensure data integrity, automate workflows, and generate reports for business insights.
- Provide support, troubleshoot issues, and train users on CRM and web applications.

IT Instructor and IT Support Technician
UCEP BANGLADESH *June, 2022 – July, 2023*

- Diagnose and resolve hardware, software, and network issues.
- Instruct and mentor school & diploma students in IT-related subjects.
- Conduct training sessions on various IT skills for students.
- Equip students with ICT skills to build careers locally and abroad

Education Qualification

Bachelor of Science in Computer Science & Engineering ***CGPA: 3.69/4.00*** | *January, 2018 – February, 2022*
Metropolitan University Bangladesh Major: Artificial Intelligent & Machine Learning

Skills

- Programming Language : Python, SQL, C, C++, Java & JavaScript
- Framework : React, NextJS, ExpressJS & NodeJS
- Data Visualization : Power BI, Tableau Excel/Google Sheets, Looker Studio, Matplotlib, Pandas, NumPy, Plotly, Scikit-learn & Seaborn
- Database : MySQL, PostgreSQL & NOSQL(MongoDB)
- Data Warehouse : Google Big Query & Snowflake.
- Statistical Analysis : EDA, A/B Testing, Root-cause Analysis, Pareto Analysis & Time Series Analysis
- Machine Learning Algorithm : Linear Regression, Logistic Regression & K-Means Clustering
- Others : Deep learning, MLops and LLM

Language

- English - Fluent
- Bangla - Expert

Project

Stock Trend Prediction model integrating news sentiment analysis (Graduate Project). Link *Jan 24 – Nov 24*
Supervisor: M. Jahirul Islam, PhD., PEng.
- Gained firsthand experience in exploratory data analysis, data visualization, multivariate analysis, and multiple time series analysis while developing a machine learning model to integrate future price predictions into trading decisions.

Laptop Store (Undergraduate Project). Link *Jan 21 – Jan 22*
Supervisor: Akhlak Uz Zaman Ashik
- Developed a web application for purchasing laptops with an integrated machine learning model to predict future laptop prices. Built using Django for the backend and react, JavaScript, and HTML-CSS for the frontend.

Customer Segmentation Using RFM Analysis with SQL. Link
- RFM (Recency, Frequency, Monetary) segmentation is a method used by businesses to categorize customers based on their transactional behavior. This segmentation approach helps in understanding customer value and behavior, enabling targeted marketing and customer relationship management strategies.

Ecommerce Purchases Analysis Using Python (Pandas and NumPy). Link
- This project involves analyzing a synthetic dataset of ecommerce purchases to answer various business questions. The dataset contains 30,000 entries with customer information, purchase details, and payment information. The goal is to utilize the Pandas library in Python to perform data analysis and derive insights that can help the client understand their customer base better.

Exploratory Data Analysis and Feature Engineering. Link
- This repository contains a detailed analysis of the Titanic dataset, focusing on two main parts: Exploratory Data Analysis (EDA) and Feature Engineering/Data Cleaning.

Certification

- Interactive Cares: Data Analytics and BI Carrier Path ***September 2024 – January 2025***
- Interactive Cares: Data Science & Machine Learning Carrier Path ***April 2025 – October 2025***
- Tutorials Point Bangladesh: Data Analytics ***January 2025 – Match 2025***
- Introduction to Applied Data Science with Python ***January 2025 – February 2025***
- Exploring Data Transformation with Google Cloud ***January 2025 – January 2025***
- Python Beginner to Advanced (Hackerrank) ***November 2024 – January 2025***
- SQL Beginner to Advanced (Hackerrank) ***November 2024 – January 2025***
- Pandas (Kaggle) ***April 2025 – May 2025***

Participation

- First in of "idea sharing 2020" arranged by "Hours of Code".
- Rank 765th at ICPC DHAKA Preliminary 2019
- Rank 25th at SUST TECHFEST Programming Contest 2019.
- Rank 28th at LU Programming Contest 2019.
- Rank 9th at MU Programming Contest 2018.

Curricular Activities

- Student Secretary at Metropolitan University Social Services Club (2020-2023).
- Office Secretary at CSE Society, Metropolitan University (2020-2021).
- Organization Secretary at Metropolitan University Photography Society (2019-2023).
- Volunteer "Sexual Harassment on Digital Platform and Approaches to Social Networking Sites" Organized by Sexual Harassment Committee Sylhet of Metropolitan University (2020).
- Volunteer "TREE PLANTATION INITIATIVE 2023" Organized by MU Social Services Club.
- Organize "Sylhet Science Olympiad 2023". Around 400 Students was participated there.
