Objective:

Highly motivated and growth-oriented individual with a strong passion for Artificial Intelligence, Machine Learning, and Deep Learning, dedicated to solving real-world challenges through intelligent, data-driven solutions. Experienced in building high-quality AI/ML/DL projects and contributing to published research papers, combining analytical thinking, creativity, and adaptability. Seeking an opportunity to contribute dedication, integrity, and a results-driven mindset while collaborating with forward-thinking teams to create meaningful value and long-term growth.

Academic Qualification:

Masters in IT

CGPA: 3.85/4.00 | January, 2023 – July, 2025

Shahjalal University of Science and Technology (SUST), Bangladesh

Major: Information Technology

Bachelor of Science in Engineering

CGPA: 3.69/4.00 | January, 2018 – February, 2022

Metropolitan University Bangladesh

Major: Computer Science & Engineering

Professional Experience:

Data Analyst

Bionic, Bangladesh

January, 2025 - Running

- Analyzed sales and operational data to define **KPIs** and deliver actionable insights for strategic decision-making.
- Built revenue forecasting models using predictive **machine-learning** techniques to support growth planning.
- Designed and maintained **automated BI dashboards** to monitor performance and improve reporting efficiency.
- Developed **merchant segmentation** and anomaly detection models to enhance engagement and operational effectiveness.

Machine Learning Engineer Intern (Remote)

DataSoft Systems Bangladesh Limited, Bangladesh

June, 2023 – November, 2024

- Developed a **Stock Trend Prediction** model integrating **news sentiment analysis** with financial data for trend forecasting.
- Implemented **NLP techniques** (word embedding, sentiment classification) to analyze financial news impact on stock movements.
- Utilized **Scikit-learn and ensemble learning models** to enhance prediction accuracy, with insights visualized
- Collaborated closely with project management team through weekly meetings to discuss project progress, challenges, mitigation strategies focusing continuous improvement.

Web Developer and CRM Administrator

Global Education Care

January, 2024 – December, 2024

- Design, build, and optimize responsive websites using modern web technologies.
- Manage, customize, and maintain CRM systems to enhance user experience and efficiency.
- Ensure data integrity, automate workflows, and generate reports for business insights.
- Provide support, troubleshoot issues, and train users on CRM and web applications.

IT Instructor and IT Support Technician

UCEP BANGLADESH

June, 2022 – July, 2023

- Diagnose and resolve hardware, software, and network issues.
- Instruct and mentor school & diploma students in IT-related subjects.
- Conduct training sessions on various IT skills for students.
- Equip students with ICT skills to build careers locally and abroad

Research Paper:

1. Enhancing Online Recruitment Fraud Detection: A Comparative Analysis of Gradient Boosting and Transformer Architectures Under Severe Class Imbalance. International Journal of Computer Applications. **(Published)** [Link](#)
2. Ahmed, N. U. (2026). Predicting Housing Affordability in New York City: A Neighborhood-Level Machine Learning Analysis Across 239 NTAs (2012–2022). Springer Nature. **(Accepted)** [Springer – Pre-Published](#)

- Ahmed, N. U. (2025). CV-Mamba: Gated CNN Transfer Learning for Mango Leaf Disease Detection with pHash-Based Deduplication and Leakage-Free Partitioning. **(Accepted)** [Frontier](#)
- Precision Maternal Health: Robust High-Risk Pregnancy Prediction via Ensemble Learning and Explainable AI. Springer. **(Under review)**
- PolyDetect: A Quality-Aware Hybrid Deep Learning Framework for Robust Polyp Segmentation in Degraded Colonoscopy Images. **(Under review)**
- Cross-Domain Transfer Learning for Brain Tumor Classification Under Limited MRI Data Regimes. **(Working)**

Project Work

- Lung Cancer Detection Using FastAPI.** [Link](#)
An AI-powered lung CT cancer classification system built with PyTorch (EfficientNet-B0) and FastAPI, predicting Benign, Malignant, or Normal cases. Includes explainable AI outputs (Grad-CAM heatmaps, lung-window and contour views), automatic PDF report generation, and unknown/non-CT image rejection to prevent false predictions on invalid inputs.
- Real-Time Facial Expression Recognition.** [Link](#)
A real-time facial expression recognition system using deep learning and computer vision, built on the FER-2013 dataset. Uses OpenCV for live face detection and a custom CNN to classify expressions into 7 emotion categories (Happy, Sad, Angry, Surprised, Fearful, Disgusted, Neutral) through a live webcam feed.
- Stock Trend Prediction model integrating news sentiment analysis (Graduate Project).** [Link](#)
Supervisor: M. Jahirul Islam, PhD., PEng.
- Gained firsthand experience in exploratory data analysis, data visualization, multivariate analysis, and multiple time series analysis while developing a machine learning model to integrate future price predictions into trading decisions.
- Customer Segmentation Using RFM Analysis with SQL.** [Link](#)
- RFM (Recency, Frequency, Monetary) segmentation is a method used by businesses to categorize customers based on their transactional behavior. This segmentation approach helps in understanding customer value and behavior, enabling targeted marketing and customer relationship management strategies.

Certification

- | | |
|--|--------------------------------------|
| 1. Interactive Cares: Data Analytics and BI Carrier Path | <i>September 2024 – January 2025</i> |
| 2. Interactive Cares: Data Science & Machine Learning Carrier Path | <i>April 2025 – October 2025</i> |
| 3. Tutorials Point Bangladesh: Data Analytics | <i>January 2025 – March 2025</i> |
| 4. Introduction to Applied Data Science with Python | <i>January 2025 – February 2025</i> |
| 5. Exploring Data Transformation with Google Cloud | <i>January 2025 – January 2025</i> |
| 6. Python Beginner to Advanced (Hackerrank) | <i>November 2024 – January 2025</i> |
| 7. SQL Beginner to Advanced (Hackerrank) | <i>November 2024 – January 2025</i> |
| 8. Pandas (Kaggle) | <i>April 2025 – May 2025</i> |

Participation

- First in of “idea sharing 2020” arranged by “Hours of Code”.
- Rank 765th at ICPC DHAKA Preliminary 2019
- Rank 25th at SUST TECHFEST Programming Contest 2019.
- Rank 28th at LU Programming Contest 2019.
- Rank 9th at MU Programming Contest 2018.

Curricular Activities

- Student Secretary at Metropolitan University Social Services Club (2020-2023).
- Office Secretary at CSE Society, Metropolitan University (2020-2021).
- Organization Secretary at Metropolitan University Photography Society (2019-2023).
Volunteer “Sexual Harassment on Digital Platform and Approaches to Social Networking Sites” Organized by Sexual
- Harassment Committee Sylhet of Metropolitan University (2020).
- Volunteer “TREE PLANTATION INITIATIVE 2023” Organized by MU Social Services Club.
- Organize “Sylhet Science Olympiad 2023”. Around 400 Students was participated there.
